

Learn about major world issues through photographic and multimedia displays. UN Exhibits is an online gallery featuring currently on view and previous exhibitions displayed in the United Nations Visitors' Lobby and in other spaces open to the public at UN Headquarters in New York. The exhibitions presented in [UN Exhibits website](#) focus on key topics – such as human rights, sustainable development, climate change, children in armed conflict, violence against women, and more – that the United Nations tackles on the ground everyday, worldwide.

UN Exhibits is not an exhaustive online gallery as it does not feature all the displays that were presented at the United Nations. UN Exhibits includes the most informative exhibitions, those that best illustrate a key theme on the UN agenda.
